

KMC Chain "e9"

EPT, anti-rust technology, self-service package, 136 links

RRP: 44,90 €

9-speed chains from KMC Chains on pedelecs have to withstand significantly higher stresses than standard chains. More weight, higher speeds and powerful drives are the reasons for this. KMC has developed its E9 chain especially for the pedelec aftermarket. The e9 is suitable for 9-speed drives. KMC manufactures the chain from stainless steel, which is why it is particularly robust and does not require much maintenance. A special anti-rust coating makes the chain particularly robust and hard-wearing. In order to be able to close the chain properly, a Connecting Link is included in the scope of delivery, which connects the two loose ends. The note "E-Bike-special" indicates that the chain is specially designed for the requirements of an e-bike.
