Dry and mixed surfaces are the Enduro tire's favorite playgrounds. The lugs are arranged in such a way that they offer maximum grip even on fast downhill rides. The Gum-X 3D rubber compound, consisting of different compounds for the tread and sidewalls, ensures the durability of the tire as well as good performance.The three-ply Gravity Shield carcass, which has its origins in Enduro, offers particularly high puncture protection. Just like the Pinch Protection - a reinforcement in the bead zone that reduces the consequences of impact bruising.
