

SCHWALBE Tube "Nr. 7"

Sclaverand valve (SV) 40mm

Price: 3,02 €

SCHWALBE No. 7A bike without a tube is possible, but not rideable. That's why you should always have a spare tube with you when you're out and about. You can usually tell which tube you need from the sidewall of the tire. The so-called ETRTO dimension can be found there. The first two digits indicate the tire width, the following digits the wheel diameter. The No. 7 from SCHWALBE fits a wide range of tires for 20" wheels. For the valve and the correct length, it is best to use the old tube as a guide: the Sclaverand SV valve on the No. 7 is 40 mm.
