

SIGMA SPORT Bike Computer "Topline BC 14.16"

wired

RRP: 59,95 €

Bike PC for climbersThe "Topline BC 14.16" from SIGMA SPORT is the right bike computer for MTBs and "mountain goats" on the road bike. Its numerous functions include an altitude measurement function - and it also displays the altitude profile graphically and the current gradient percentage. The temperature display is practical for outdoor use. Using NFC (Near Field Communication) and the SIGMA Link app (Android), the data can also be retrieved wirelessly on a smartphone.Data transmission from the transmitter is wireless. The STS version is also available with an optional cadence transmitter. Dimensions: Height x width x depth: 53.2 mm x 40.3 mm x 12.2 mm. Adjustable to two wheel sizes for two bikes.
