

SIGMA SPORT Battery LED Light Set "Aura 60 / Nugget II"

black

RRP: 69,95 €

Bright, compact and rechargeable The "Aura 60 Lux USB" Front Light from SIGMA SPORT casts its 60 lux bright and harmonious light image onto the road up to a distance of around 70 meters. At the same time, the "Light Guide", the surrounding light strip, ensures lateral visibility. The LED Front Light creates a homogeneous field of light at close and long range in front of the bike and at the sides, without dazzling other road users. With its functions, the splash-proof and StVZO-approved Front Light is suitable for both sporty riders and commuters who are on the road every day. Its three light modes 60 lux, 30 lux and 18 lux in eco mode offer the right brightness for every situation: from economical operation in illuminated city traffic to full use in the evening away from illuminated roads. Depending on the mode, the light lasts between 4 and 10 hours. The integrated lithium-ion battery can be recharged in a maximum of 3.5 hours using the micro USB cable supplied.The practical silicone Handlebar Bracket is firmly attached to the Battery Front Light and guarantees easy and precise attachment to any bicycle handlebar. It is also compatible with other SIGMA mounting systems, such as the Screw-Bracket and the Universal Helmet Mount.The "Nugget II" Battery LED Rear Light is also small, compact and rechargeable. When it is mounted on the seatpost without tools using the rubber rings supplied, it shines up to 400 m to the rear and sides. The Rear Light is splash-proof, weighs only 24 g and lights for 6 hours. The lithium-ion Battery is recharged in two hours via the integrated micro USB charging function. Approved in accordance with the German Road Traffic Licensing Regulations (StVZO).

Datos maestros

Número de artículo del proveedor:	17750
EAN	4016224177509
UVP	69,95 €
DST-Code	2E01
