

SUPERNOVA Front Light "V521s"

matt black, multi-mount bracket for fork crown/bridge

RRP: 149,00 €

Modern technology in a timeless designIt is small and compact, simply bright and practical: the SUPERNOVA "V521s" LED Front Light for pedelecs cuts a fine figure even when switched off with its timeless, puristic aluminum housing. However, it is almost too good to switch off, as it has a permanent but energy-saving daytime running light function without an additional LED. The tried-and-tested Terraflux 3 lens and the new high-performance LED work together perfectly to throw 235 lumens, 15 percent more than its predecessor, onto the road. The insides of the 49x41x41 mm (LxWxH) compact housing made of robust aluminum not only provide light control between daytime running light and night light. A soft start function and Overvoltage Protector ensure a long service life and compatibility with almost all e-bikes up to 25 km/h. But the Front Light is not only suitable for pedelecs. For off-road use, it can be mounted on MTBs with the matching bracket from SUPERNOVA, powered by a Powerbank via the USB port. The SUPERNOVA "V521s" LED Front Light comes with a five-year warranty. Available with various brackets.

Datos maestros

Número de artículo del proveedor:	Q-V521S-MBLK
UVP	149,00 €
SB-Artículo	Sí
