

# CONTEC QR Wrench Set "SQR Select + S"

limousine black

**Price: 7,99 €**

Effectively protected from theftSuper annoying: When you leave your bike locked, sometimes thieves come by and steel the seatpost or wheels. The "SQR Select +" quick release set reliably prevents this. The set consists of a locking spanner, a front wheel axle (M5 x 112 mm), a rear wheel axle (M5 x 145 mm) and a seatpost clamp (M6 x 45 mm). It provides excellent protection against theft: The quick releases can only be opened with the special security lever. The axles of this set are made of high-quality chrome-molybdenum steel. Here, you benefit from a high tensile strength as well as good anti-break properties. The aluminium 6061 of the axles also has a high tensile strength. It also is lightweight. With this quick release set, you can choose from many attractive colour designs in the "Select" family by CONTEC.

## Datos maestros
