

CONTEC Cable Lock "PowerLoc"

Ø 12mm, 300g, security level: 6

RRP: 18,95 €

The flexible guardThe CONTEC cable lock "PowerLoc" is a well thought out combination of strong protection and flexible options for locking up bicycles. A versatile model for high demands.This bicycle lock consists of a 85 cm long steel cable. The length is the basis for a flexible and secure locking of the bicycle to lantern poles or other suitable places. The steel offers reliable protection, but at the same time it is highly flexible, so that bicycle owners can bend it very easily and also loop around a pole several times.Durable vinyl covers the steel. The material was deliberately chosen for the coating on this bicycle lock. It protects the cable from moisture through its waterproof structure, thus preserving the functionality and flexibility of the lock. Hands and bicycle frames are reliably protected against scratches and other damage.X2-Power - the "Double Bolt Locking System" - is another reason why this cable lock by CONTEC is so secure. It impresses with its double bolt lock. The bolt is locked on both ends. This makes it impossible to pull it open. The "BumpBlock M-Zylinder" also offers high protection. This precision locking cylinder is safely protected against drilling, impacts or pulling, because it is located inside a resistant steel capsule.The cable lock is supplied with 5 keys: 4 classic keys and a practical LED key. The latter ensures that the bicycle lock can be used even in the dark. "PowerLoc" is a sophisticated model for protecting high-quality bicycles.
