

CONTEC Combination Cabel Lock "PowerLoc"

Ø 12mm, security level: 5

RRP: 18,95 €

Security through numbersThe good old combination locks in an ultra-modern and secure version: with the CONTEC "PowerLoc" combination cable lock, every user can look forward to a first-class security concept.This bike lock is made of hardened steel. At 85 cm in length, it forms the solid basis for this secure combination lock from CONTEC. Despite its robustness, the steel cable is convincingly flexible. It can also be looped several times around a lamp post or the frame of the bike - effortlessly.The handling when securing the bike is further enhanced by the sophisticated coating of the cable: high-quality vinyl protects the outside and inside. On the inside, the cables are protected from dirt and corrosion caused by moisture, while on the outside the vinyl prevents scratches on the bike frame. The coating also protects the user's hands and the attachment points where the bike is secured. The Lock itself scores with 2 advantages: Firstly, 10,000 number combinations make it practically impossible to guess the code. Secondly, the X2-Power "Double Bolt Locking System" minimizes tear-out resistance, as the bolt is locked at both endpieces. Small steel balls in the Adjusting System make the combination locks even more secure. The Click-Combo-Gear system provides optimum protection against tearing or drilling.The practical Velcro fastener allows the cables to be rolled up again and again and stowed in the Bag. The classic combination locks in inconspicuous black are a safe companion and reliably protect your bike.
