

## CONTEC Glasses "DIM+"

black / coolgrey

**Price: 32,50 €**

Highly functional in any weather! If you're on a bike, you want to feel prepared for everything. This, of course, also affects what you see. When on the go, the lighting conditions can change quickly. With the sports glasses "DIM+" by CONTEC, cyclists are optimally equipped in all circumstances. The highly functional glasses with the Dim Sun system provide 100% UV protection, not only helping to ensure good visibility in direct sunlight, but also protecting the eyes. That's not all: The sports glasses by CONTEC have a photochromic coating. This allows the lenses to adapt to changing ambient light. This makes it superfluous to change the lens while on the go, even if the light conditions change significantly within a short period of time. In addition to their versatile functions, the "DIM+" sunglasses are also characterised by a high level of wearing comfort. Durable and ultra-lightweight, these glasses offer a custom fit with an adjustable nose pad. Made of flexible thermoplastic, the frame is robust and provided with a soft grip coating. The replacement lenses are made of light polycarbonate. This makes them break-proof and prevents damage on the go. The bicycle glasses, including the case, are available in black and grey or white and grey. CONTEC's "DIM+" sports glasses are a quality product for all cyclists and outdoor athletes who value good workmanship and high functionality. With these glasses, the biker has the best view at all times, both in the sun and in the shade.
