

CONTEC Vario Seatpost "Big Drop-A-Gogo"

Ø 30,9mm, 480mm long

RRP: 249,95 €

Extra large, extra flexible, extra funQuickly extend and retract in seconds using the handlebar remote for more control on an MTB: With the dropper seatpost "Drop-A-Gogo", CONTEC gets things going. The operation works without any tinkering, simple and fast.CONTEC has designed the "Drop-A-Gogo" for increased control on the bike, even in demanding downhill sections and in very difficult terrain. With a drop of up to 170 mm with a post length of 480 mm, the "Big Drop-A-Gogo" offers plenty of room for demanding trails. The insertion depth is between 105 and 275 mm.The decisive difference to a fixed seatpost: the increased freedom of movement. On command, the dropper seatpost can be continuously raised and lowered again. There is no need to stop to adjust the post to your wishes.Due to its internal cable routing, the "Drop-A-Gogo" looks particularly elegant. A cable that runs along the outside of the seat tube doesn't interferes with riding.The tubes of this dropper post by CONTEC are made of high-quality 7075 aluminium. This is an alloy that is also used in aircraft construction. In this way, the light weight of only 565 g is achieved.Furthermore, its hard anodised surface makes the post resistant to scratches and maintains its cool black appearance and quality for a long time.In addition, the "Drop-A-Gogo" is sealed in such a way that it reliably keeps dust and water out.Supplied with 2 levers for the cockpit. For one, there is a universal lever for mounting on an MTB with a front derailleur and a corresponding shifter. This one can be mounted on either side of the handlebar. In addition, a second lever, especially made for mounting on the left-hand side, is included. This is designed for bikes with only one chainring, where there is no front shifter.With the "Big Drop-A-Gogo" by CONTEC, one has a special large dropper seatpost for maximum flexibility and a very high fun factor on an MTB.
