

CONTEC Front Light "DLUX 120 E+"

self-service package

RRP: 79,95 €

Bright & safe through commuter trafficFor the daily commute, an LED headlight with 120 lux is just right for the e-bike. The high beam power provides both very good visibility in road traffic and excellent illuminated paths.This headlight is suitable for connections to batteries with a 6 to 12 volt voltage. Thanks to the plastic universal holder, the light can be mounted easily. But so that you are not only seen from the front or rear, recesses have been let in on the sides of the housing. This allows the light to spread more widely. The headlamp can be precisely adjusted via two axes.The lightweight and robust aluminum housing promises a long durability of the headlamp. The lighting has a German mark of conformity. With the removable front reflector it puts in terms of visibility again a top and meets the requirements of the Road Traffic Licensing Regulations (StVZO).
