

SRAM Rotor "HS2"

6-hole, Ø 220 mm, with steel Mounting Screws

RRP 74,00 €

The SRAM HS2 stainless steel brake rotors have been specially developed for MTB and E-MTB and offer noticeably improved braking performance and reduced noise compared to previous rotors. This is made possible by the 2.0 mm thick rotors, an optimized profile for better pad traction and recessed spokes with a heat-dissipating coating that significantly improve heat management. The rounded outer edges increase safety and facilitate wheel installation.
