

CONTEC Handlebar Tape "Prestige.Cork"

light blue

RRP: 13,95 €

Handlebar Tape is an ideal way to customize your road bike or gravel bike to your liking. The material determines your comfort and the design determines the overall look of your bike. With the CONTEC Prestige.cork handlebar tape, you have found the perfect balance between functionality and aesthetics. It is made from a mixture of cork and EVA foam and uses the natural damping properties of cork to effectively absorb vibrations and shocks. This is particularly noticeable on uneven roads. Thanks to the porous surface of the cork, the CONTEC Prestige.Cork offers you enough grip to keep a firm grasp on the Handlebars even in wet conditions. The EVA foam complements these properties with its durability and low weight, making the Handlebar Tape easy to clean and resistant to the elements. The Prestige.Cork is 200 cm long, 3 cm wide and has a thickness of 2.5 mm. The elastic materials make it very easy to wrap. Two Handlebar Plugs and adhesive strips for fixing are also included in the packaging.

Datos maestros

Número de artículo del proveedor:	VLT-1001CORK LIGHTBL
EAN	4251971165328
UVP	13,95 €
DST-Code	2B04
SB-Artículo	Sí
Bidex-Code	205030
Fedas-Code	160216
Marca/Proveedor	CONTEC
Unidad de medida:	PACKAGE
Weight	0.067 kg

Datos técnicos

Anchura	3.0 cm
