

CONTEC Vario Seatpost "Drop-A-Gogo II"

Ø 31.6 mm, 460 mm long, 150 mm adjustment range (special item, loose)

Price: 99,99 €

As a passionate MTBs and cycling enthusiast, you know that the right equipment makes the difference between a good ride and an unforgettable one. Motivated by the success of our first generation Vario Seatposts Drop-A-Gogo, we have listened carefully to feedback from bikers like you and now proudly present the "Drop-A-Gogo II". The new development brings with it numerous improvements, such as greater stiffness for even better control and an extended adjustment range of up to 230 mm. Of course, you don't have to do without the familiar functions of our popular Drop-A-Gogo - the Drop-A-Gogo II can still be infinitely adjusted in height using a mechanical lever. And in a matter of seconds, even while riding. Two mechanical adjustment levers are included in the scope of delivery: one horizontal and one vertical. The latter is compatible with the CONTEC G-Link system. Good to know:- Compatibility with the CONTEC G-Link system: Accessories and grips equipped with the G-Link Interface can be connected directly to each other. In this case, the lever of the Drop-A-Gogo II moves closer to the hand, which ensures improved ergonomics and a tidy appearance. - Strong materials: The "Drop-A-Gogo II" is characterized by its robustness and reliability. So you can be sure that it will withstand even the toughest demands - whether on an "organic" bike or an e-bike.- Individually adjustable adjustment range: The reducing adapters included in the scope of delivery allow you to individually adjust the adjustment range of your Seatposts by 5, 10 or 20 mm. This allows you to tune the "Drop-A-Gogo II" even better to your needs. Material & maintenance: The adjustable seatposts are made from lightweight and sturdy 7075 aluminum. Overall, the Drop-A-Gogo II weighs just 540 g (with Ø 30.9 mm / 150 mm adjustment range) and therefore offers an impressive balance of strength and lightness. The internal cable routing ensures smooth running, regardless of weather conditions, and gives your bike a tidy appearance. In combination with the glide-optimized surface treatment of the stanchion tube, you can expect smooth performance in all conditions. Dust- and water-repellent seals, a low-maintenance and replaceable cartridge and a scratch-resistant surface treatment of all tube elements ensure a long service life. The Saddle Clamp is compatible with round and oval (7x9 mm, 7x9.3 mm, 7x10 mm) seat stays. If your Drop-A-Gogo II does need a little maintenance, you can easily do it yourself with our matching Service Kits.
