

MOTOISM Adapterkabel / Widerstand

For HONDA turn signals. Vehicle-specific adapter cable. This indispensable component contains all the parts required to ensure that the flashing frequency is correct after the blinker conversion and no incorrect messages are displayed in the cockpit. The scope of delivery includes two adapter cables for the turn signals with vehicle-specific plugs, possibly with integrated adjustment electronics (resistance units).

The corresponding wattage can be taken from the turn signal lens of the original turn signals.

Scope of delivery: 2 pieces
